

CONNECTED LIVING

Vodafone, through Vodafone Business Ventures, has partnered with Mencap on a ground-breaking project, co-designed by people with learning disabilities and their support workers. Connected Living aims to provide people with learning disabilities greater independence, choice and access to tech through Internet of Things (IoT) enabled devices and personalised digital services. The tech has been designed to help improve quality of life for over 1.4 million people living with learning disabilities in the UK, their families and carers.

My Room
enables residents to manage smart plugs, smart locks and smart lights via the app

My Day
is a personalised diary management tool that enables users to create daily reminders for everyday tasks

Call Support
allows prompt remote support via a digital 'panic button' that allows two-way video calling between residents and support worker with one touch

My Talk
provides those with speech problems another way to communicate, via personalised images, text and a speech function

To Do List
enables users to create easy to manage to do lists to encourage them to carry out and tick off tasks throughout the day

Other IoT tech trialled include:

Activity Sensors
which detect unexpected movement and alert support workers

How To
allows residents and support workers to create visual guides for everyday tasks

My Front Door
enables residents to answer their front door and check who is calling from anywhere in the house

Other IoT tech trialled include:

Smart Locks
which can be used to provide residents privacy and a sense of security in their own rooms
